Alexandru Ardelean

Embedded SW/Linux Kernel Engineer

Contact details

Email: alex@shruggie.ro

Phone: +40745307413

Location: Cluj-Napoca

About Me

Embedded software developer, primarily skilled in C, shell, some Python, some automation, and some various other topics.Contributor to various open-source projects (Linux kernel, OpenWrt, and other).

Github profie: https://github.com/commodo/

Linux kernel contributions: roughly 1400+ (code contributions and reviews).

More recently, I started doing Computer Vision with AI model training (YOLO, HRnet) and getting them to work on embedded devices (taking up 2-3 Watts of power).

Skill sets

C	15+ years	Python	4+ years
Embedded Development	15+ years	Linux	7+ years
C++	5+ years	Drivers	7+ years
Shell/Bash	7+ years	DevOps/CI Automation/Tooling	4+ years
Yocto	4+ years	Buildroot	5+ years
Computer Vision, AI Model Training AI Model Inference YOLO, HRnet	1+ years		

Professional Experience

May 2022 - Present	**Contractor for Embedded/Linux projects** Role: ¯_(ツ)_/¯ Company: Shruggie Location: Cluj-Napoca Clients I've had along this trip: • MXT Creation – Create BSPs for Renesas RZ/V DRP AI SoC families (RZV2L, RZV2M(A)) • MXT Creation – Train and deploy AI Computer Vision

models on Renesas RZ/V DRP AI SoC families
- STIHL: features and performance improvements for the iMOW (lawn-mower robot) launched in 2023
- Ateme: rework of a TS muxer library for a HW video encoder
- Allegro DVT (through Deviqon Labs): continue work on emulator for HW IP designs
- BrightGrove (consultancy group): develop platform for a new line of smart TVs (for a customer of BrightGrove)
- MathWorks (makers of Matlab/Simulink): kernel support for RF applications

March 2021 – February 2023	**Deviqon Labs**

Role: Senior Software Engineer
Location: Cluj-Napoca

Write software aimed at services for the streaming & television industry
Clients:
- Ateme (acquired Anevia): create and extend software for video/audio/TV streaming and DRM
- Allegro DVT: create emulator for a HW IP designs (for video decoders)

December 2017 – February 2021	**Analog Devices Gmbh**

Role: Linux Kernel Engineer
Location: Cluj-Napoca

Role includes:
- Work on Linux kernel drivers for Analog Devices parts (ADCs, DACs, accelerometers, IMUs)
- Work and enhancements (to the Linux kernel) to better support Analog Devices parts
- Continuously interact with Linux kernel community by submitting changes to the Linux kernel
- Internal code review for new changes being added to the Analog Devices kernel repository

Boards/carriers used:
- Xilinx Zynq 7 series: ZedBoard, ZC706, ZC702
- Xilinx ZynqMP series: ZCU102, ZU11EG
- Intel/Altera Arria10 SoC

https://patchwork.kernel.org/project/linux-iio/list/?submitter=178229

2016 - 2022	**Co-maintainer of the mstpd package**

Role: Co-maintainer
Location: Github

Co-maintain the mstpd package/code-base (Multiple Spanning Tree Daemon) with other developers

https://github.com/mstpd/mstpd/commits?author=commodo

2014 - Present	**Open-source contributor to OpenWrt** Role: contributor Location: Github / git.openwrt.org OpenWrt is an embedded Linux distribution for routers. Contributor of various patches to core OpenWrt. https://github.com/openwrt/openwrt/commits? author=commodo Maintainer of a few packages in the packages feed: https://github.com/openwrt/packages/commits? author=commodo
January 2014 – December 2017	**Ocedo / Riverbed Technology** Role: Embedded Software Engineer Location: Cluj-Napoca Riverbed acquired Ocedo (which was a small networking startup based in Karlsruhe Germany). Develop and maintain software modules and drivers for network gateways, switches and access-points. • Integration of 3G/4G connectivity in gateways • Integration of Spanning Tree (STP) and Link-Layer Discovery (LLDP) protocols in switches • Support for some Broadcom switch chips • Internal code reviews
April 2013 – January 2014	**Betfair.com** Role: DevOps for internal tooling Location: Cluj-Napoca Maintenance & support for internal tools: Gitlab, Perforce, SVN, Jenkins, Atlassian (Confluence, JIRA, Fisheye), Fortify. Automation of deployment processes using various tools (Jenkins CI, Chef, Puppet).
November 2012 – April 2013	**EBS Romania (currently NTT Romania)** Role: Embedded Software Engineer for Automotive Location: Cluj-Napoca Develop SW & documentation for Continental Automotive for various work on instrumentation clusters.
August 2011 - November 2012	**NSpyre Romania (currently Capgemini Romania)** Role: Softwre Engineer Location: Cluj-Napoca Write software modules & documentation for controlling highly complex industrial machines, for ASML (https://www.asml.com/en)
March 2007 – August 2011	**National Instruments Romania** Role: Software Engineer Location: Cluj-Napoca • Primarily worked on Pharlap (RTOS) • Write drivers for ethernet cards for PXI products for the

Pharlap OS
- Develop & maintain the TCP/IP stack on the Pharlap
- Add advanced debugging features to Pharlap OS to better debug network issues
- Maintain LabVIEW network primitives across Windows, MacOS, Linux, Pharlap and VxWorks operating systems

Education

2003 - 2008	**Technical University of Cluj-Napoca**
	Computer Science Department (English Section)
1999 - 2003	**"Mihai Eminescu" High School – Satu Mare**
	Mathematics and Informatics (English Section)
